

ARCHITECTURE DOCUMENT

Test Automation Suite Agent - Multi-Agent AI System

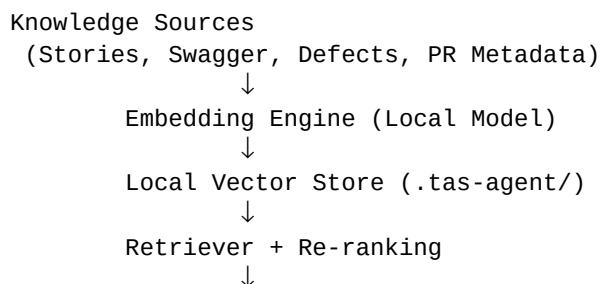

1. High-Level System Overview

- Local-first CLI + VSCode plugin based execution
- Planner–Executor multi-agent orchestration
- RAG-based contextual intelligence
- Enterprise-grade API automation generation
- Closed-loop compile + dry-run validation
- Auto-patch with developer approval

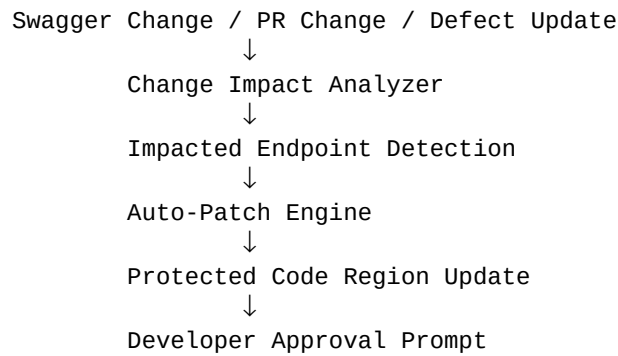

2. System Flow Diagram

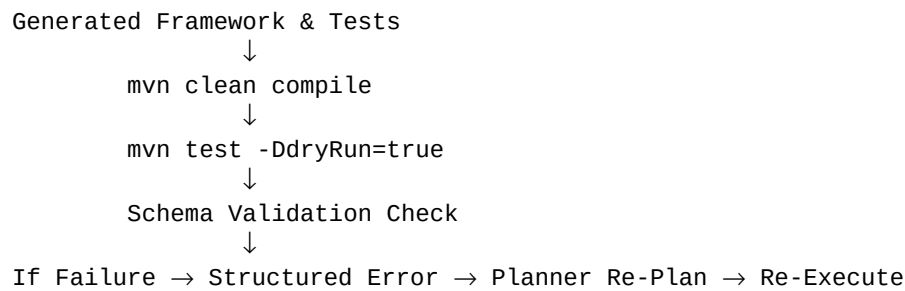

3. RAG Architecture Diagram

4. Change Impact & Auto-Patch Flow

5. Validation & Self-Correction Loop

6. Extensibility Model

- Future Self-Healing Agent
- Flaky Test Analyzer
- Performance Test Generator
- Security Test Agent
- SaaS-ready vector store abstraction
- SecretProvider abstraction for secure credential management
